Whole Number 468

Curious Optical Illusion

The Duchess of York, 20,000-ton Canadian Pacific trans-Atlantic steamer, is not going to crash the new bridge which, a few days after this picture was taken, was completed across the St. Lawrence in the harbor of Montreal, although the odd result of the photographer's work makes a smash-up seem almost inevitable. As a matter of fact the bridge is actually 26 feet above the tip of the liner's foremast which itself is 30 feet higher than the funnel. The mid-gest figures of the steel workers on the bridge give another indication of the great height of the structure.

Smoking forests or smoking chimneys—WHICH?

WE CAN'T HAVE BOTH

Over one-half of all Canada's industries depend on wood as a raw material. When the forests are destroyed mills must close down, railway earnings must suffer, trade must stagnate and prosperity must vanish.

Issued by authority of
Honourable Charles Stewart,
Minister of the Interior.

PREVENT FOREST FIRES

ELEVATORS TO CLOSE.

All the Elevators in Stony Plain and Spruce Grove will Close at 12 o'clock Noon on Saturdays, from May First to September First.

Anglican Chapel to Be Sold.

There having been no services held in the local Anglican chapel for several years, the Bishop of this diocese is said to have authorised the putting up for sale of the building on Second street in which the services were formerly held. The structure is about 32 by 24 feet, and it should meet with a ready sale.

A Suggestion for One-Eyed Motor Cars.

A very noticeable feature these evenings is the number of cars running around the town and district with only one light operating.

For the convenience of the traveling public, the owners of these cars should get together and decide on which side of their cars their one light should be placed; as, at present these one-light drivers are a puzzle to operators of other cars they meet at night on the roads.

Or, for the sake of variety, the One-lighters could have their right light going every night for a week, and then change over to the left light for the next week.

Opening of St. Phillip's Church

Contractor Pailer is putting the finishing touches on the St Phillip's church, the new R. C. edifice in Stony Plain. The formal opening will take place on Sunday morning next at 9.30 His Grace Archbishop O'Leary will make the formal opening. His Grace will be accompanied by several clergymen from Edmonton.

It is expected that several of the former pastors will be in attendance, including Rev J J O'Halloran, now of Castor. There will be administration of the Sacrament of Confirmation.

Loyal Order of Moose.

If the arrangements now under way prove successful, Stony Plain and district will have a new lodge organized here. This will be a branch lodge of the Loyal Order of Moose. A certain number here are already members, and this has encouraged the organizers of the Order to go ahead and establish a lodge at this point. Mr W E Gellhouse, of the A. P. Elevator, has been a prominent member of the Order for some time, and has high hopes of this being accomplished. Mr A J Ingram, deputy grand regent and supervisor for Alberta, was a visitor in Stony Plain on Friday, with this end in view, and interviewed a number of the prominent residents of the town and district. Further particulars of this will be given later.

What Is a Good Government?

Hon. R. D. Bennett, in addressing a meeting at Stratford, Ontario, recently asked a question, and in answering it, gave a definition of a good government. He said:

"Is it not time that we had a government that would look after the interests of Canadians and Canadians only? You say that is a selfish policy. Ah, my friends, all good governments are selfish and the measure of the goodness of a government is the measure of its selfishness."

Mr. Bennett was, of course, discussing the relative merits of the tariff policies of the Liberal and Conservative parties, and especially so in the light of the impending tariff changes at Washington. These being issues of a partisan character it is not our intention to discuss them, or express any opinion in regard to them. But it is quite in order to analyze and discuss Mr. Bennett's dictum that "all good governments are selfish," and that the measure of the goodness of a government is the measure of its selfishness.

Governments under our democratic system of responsible government are, or should be, but a reflection of the people themselves. They are brought into being by the expressed will of the people and are supposed to give expression in legislation and administration to the wishes of the people. Therefore, if a good government is a selfish government, it follows that selfishness is the sign manual of a good people, and that the selfishness of any people is the measure of their goodness. Do the Canadian people believe this? Are they prepared to accept it as true?

Acceptance of this doctrine would be to deny all the teachings of Christianity. It would be to nullify and reject the Golden Rule. It would set up a standard of conduct for nations and peoples that could have but one result—continual warfare.

If the measure of the goodness of a government is the measure of its selfishness, then a "good" government in Manitoba, Saskatchewan, Alberta, or any of the other Provinces, would be one which pursued a policy designed to advance its own interests regardless of the interests and welfare of any other Province, or of the Dominion, or the Empire as a whole. Such a policy would mean endless friction, constant turmoil, the ultimate smash-up of Confederation.

Suppose, for example, that rightly, or wrongly, the Western Provinces of Canada insisted that their particular interests demanded the complete removal of all customs tariffs, and they refused absolutely to give any consideration to the views, the interests, the welfare of the Eastern Provinces which believe in customs tariffs. What would be the result?

All government is a matter of compromises. No one group of people, no one community, no one province, can selfishly insist upon acceptance of its views and its policies to the detriment of all other groups, communities and provinces. But if selfishness is to be the measure of a good government, then, in accordance with each group, or community, or province, upon its own views and policies means that any and all compromises will be impossible, and government itself must fall.

Acceptance of Mr. Bennett's doctrine would condemn the governments of Great Britain for many decades past as the worst governments in the world, because it has been the policy of British Governments to adopt policies of unselfishness, to assume heavy burdens and accept great responsibilities in behalf of backward peoples and smaller and weaker nations. Great Britain unselfishly entered the war against Germany in defence of the rights and integrity of Belgium. Following the war Britain waived all debts owing to her by other allied countries, save, and except an amount sufficient to cover her own indebtedness to the United States. These are but two comparatively recent examples of British policy, but it is being exemplified at almost every meeting of the League of Nations that League, for example, could not exist five minutes if the nations of the world were animated by, and acted upon Mr. Bennett's definition of what constitutes a good government.

The most selfish form of government is an absolute autocracy. How would Mr. Bennett like Premier Mackenzie King to adopt the selfish attitude of Mussolini in Italy, take all powers of government into his own hands, and prohibit any opposition parties from functioning? That's selfishness in government. Is it good? Whatever Mr. Bennett may think, the people of Canada want none of it.

Suggests Powerful

Signals For Vessels

Sea Should Be Better Illuminated
Says French Writer

A well-known French writer has pointed out that ships have been backward in making use of the great improvements made in modern electric lighting. He states that in this modern age of illumination the sea is the only part of the globe which is plunged into obscurity at nightfall, and recommends that ships should employ powerful signals like the headlights of motor cars. Undoubtedly

the weakness of ships' lighting is a contributory cause to many collisions that occur at night, and the fuller study of the possibilities of more powerful electric lighting is worthy of the labors of the Conference (the International Conference for the Safety of Life at Sea.)

Holstein Bull Goes East

Prize Winner From Strathmore Purchased By Quebec Interests
The Raymond Farm, at Vaudreuil, Quebec, recently purchased a Holstein bull from the Canadian Pacific supply farm in Strathmore. This young bull, Strathmore de Vaudreuil, was junior champion last year at Calgary, Edmonton and Saskatoon, although defeated at other shows by his herd mate Strathmore McKinley Fairchild Wayne.

Horses Live In Zoo

The stable of a London horsekeeper is a zoo, the animals sharing the house with the horses. There are 100 horses in the stable and with them, living contentedly, are two Indian monkeys, a wild hare, a vixen, pig-sons, rabbits, canaries and foreign birds.

No Unemployment

Problem In Iceland

Country Offers Great Opportunities Through Undeveloped Land
Iceland has no unemployment problem, not because folks have to work to keep warm up there, but because Iceland is an undeveloped land of great opportunities.

The unemployed of Reykjavik totalled eight men on May 1. Six of them were more than 60 years old and in ill health. The other two said they had just left their jobs, and could get better ones.

Iceland, peopled with only 100,000 inhabitants, could comfortably find accommodation and employment for 900,000.

Iceland wants dirt farmers, not men to keep the bright lights of Reykjavik burning. The native Icelanders are good farmers, but not scientific agriculturists.

Government authorities maintain that Iceland could produce far greater quantities of agricultural products than at present, as the soil and climate are excellent for many crops.

LIFE WAS A BURDEN

Health Restored Through the Use Of Dr. Williams' Pink Pills

"I am writing to express my gratitude for what Dr. Williams' Pink Pills have done for me," says Mrs. W. J. Dowling, Tottenham, Ont., and says so violently that I would have to lie down. My feet and legs would swell and cramp, and all my friends thought I was in a decline. In this condition I was urged by a friend to try Dr. Williams' Pink Pills. I got three boxes, and to my delight, by the time I had used them I began to feel better. I got a further supply and kept on using them. Daily I felt myself growing stronger. The color returned to my cheeks and lips and I felt a new interest in life. To sum up I can now say that I am feeling fine, for which I give the credit to Dr. Williams' Pink Pills, which I strongly recommend to all weak girls and women."

A useful book, "Building Up the Blood," will be sent free on request by Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail post paid, on receipt of price, 50c. Try them today.

Moose Jaw Tourist Camp

Additional facilities are being provided at Moose Jaw Tourist Camp. Last year about 7,000 people used the camp and the present season is expected to witness a considerably increased attendance.

Müller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

Farm Planning

Town planning in Alberta is now being extended to include farm planning. The farmer may secure expert advice concerning the plans for his house and barns, and the lay-out of his farm.

Believes Asthma At Once. If you could read the thousands of unsolicited letters received by the makers of Dr. J. C. Kellogg's Asthma Remedy, you too would realize the remarkable powers of Dr. J. C. Kellogg's Asthma Remedy. All cases, including chronic and incurable, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Waiter: What's the matter with that egg, boss?

Diner: It was served too late to be good egg and too soon to be good chicken.

Canadian Teachers' Federation

1930 Convention Will Be Held At Edmonton

The selection of the venue for the 1930 convention of the organization, the election of the executive committee and the adoption of a number of resolutions comprised the final business transacted at the closing session of the tenth annual conference of the Canadian Teachers' Federation at Quebec.

Edmonton, Alberta, was chosen for next year's conference at a date to be decided later by the executive committee.

The following members were elected to the executive committee of the federation: G. H. Ford, Westminister, B.C.; A. J. Powell, Sask.; J. R. Mackay, Saskatoon, Sask.; A. E. Heard, Winnipeg, Man.; J. E. Robertson, Toronto, Ont.; Miss L. E. Brittain, Montreal, Que.; H. C. Rickter, West St. John, N.B.; J. A. D. Good, Truro, N.S.; and C. B. Jelly, Summerside, P.E.I.

New Plane Is Climber

British Machine Reaches Four Mile Height In Fourteen Minutes

An all-steel airplane that can climb to a height of four miles in less than 14 minutes is the latest addition to Britain's air fleet.

The plane is a single-seater equipped with a super-charger and specially-gearred Jaguar motor developing 400 horse power. With a full load of machine guns and ammunition in addition to electrically heated clothing and oxygen breathing apparatus, it can climb to a height of six miles. Its top speed is 135 miles an hour.

The plane is intended to take off from a home defense aerodrome and climb rapidly to get above enemy raiding machines as soon as information is received that they have crossed the coast.

Developing Trade

Increased Travel To The West Indies Follows Inception Of New Service

Since the inception of the new service between Canada and the British West Indies, by the R.M.S. Lady Nelson, in December last, the Canadian National steamships' boats have been practically booked to capacity on every sailing. Traffic from Canada to the West Indies has developed tremendously since the inception of the new Canadian National liners, and there has also been an increase of travel from the West Indies into Canada particularly in the summer time when attractive rates give the West Indies business man an opportunity of going to Canada to study the markets there.

Corns cause much suffering, but Hollaway's Corn Remover offers a speedy, sure, and satisfactory relief.

Very Considerate

"I just had a 'phone call from Skipper. He's the most considerate boy I ever knew."

"What did he have to say?"

"He wanted to know if I got home all right from the dance he took me to last night."

Keep Minard's Liniment in the Medicine Chest.

Denied Entrance To States

Young Toronto Inventor Claims He Has More Powerful Substitute For Gasoline

Denied entrance into the United States even for an hour, during which time he had expected to lay his invention before officials of the General Motors Corp., Jack Star, 187 Grace Street, Toronto, claims that he has a lighter and more powerful substitute for gasoline.

Mr. Star is a comparatively recent arrival in Canada, his name in Europe being Jack Starinski. He is a former racing motorcyclist, and said he had been working on his formula for nine years and had visited Europe, Asia and the continent in search of sources of supply. He carries credentials from Sir Herbert Samuel, British commissioner for Palestine, Mustafa Kemal Pasha and other notables. His researches have involved great expense and long study, he says, and he is working now to obtain world patents on his discovery. He declares he had made arrangements with Frank J. Kinsinger, attorney, of Detroit, to assist him. He was denied entry to Detroit, however, for an hour, although he had offered to leave his car with the authorities at the ferry dock.

It isn't the girl who fires up quickly that makes the best match.

Are You Ready

When your Children Cry for It

Baby has little upsets, at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castor Oil. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drop. Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot get away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea: effective, too, for older children. Twenty-five million bottles were bought last year.

**Fletcher's
CASTORIA**

Dandruff

Rub Minard's into your scalp four times a week. Prevents falling hair.

Building of Bay Line May Be But Start of Railway Development in Rich Mineral Districts of North

The golden spike that will be driven next month in commemoration of the completion of the Hudson Bay Railway inspires a vision of future practicalities in Sir Henry Thornton of the Canadian National Railways, in an article in the Saturday Evening Post. He paints a picture of contrasts. He looks back upon the setbacks:

"For years the line lay uncompleted, eroding, its roadbed sunk so deep in places that the rails jutted forth like steel tentacles. Men have fought blizzards, loneliness, the rigors of sub-Arctic winter to complete it, that there may be a new outlet to Europe, entailing a shorter rail haul, and, strangely enough, a shorter ocean voyage than from any other port on the continent. It is a land of Eskimos and pioneers now."

But what does Sir Henry see planned to the northward when that golden spike is driven?

"I believe there may be a time when great hotels will rear themselves at Fort Churchill, the terminus, to accommodate the tourists who have sailed up the eastern coast, along the fringe of Labrador and through Hudson Strait, then on down through a bay that was once the roving ground of that romantic aggregation known as the Gentlemen of Adventure; at least to disembark and proceed home with the every comfort of most civilized travel."

The Hudson Bay line will be given a terminus at Churchill, but that will not be the end of the railway. "A railroad," says Sir Henry, "is never finished." It has to grow with the development it starts. "Who dare predict the scope of the development that will gather wings to put to flight the little sweep that already has proved the northward to be a region of riches? What has been revealed before the golden spike has been driven is barely a lifting of the curtain upon the great drama that will be played in the vast hinterland of Manitoba. Other prospects will not be denied their railroad accommodation. The terminus of next month will become the junction of many lines. "A railroad is never finished."

"The Hudson Bay line proves that," says Sir Henry. "For years people discussed whether the road could live, once it were built. There was the problem of whether the grain haulage would be sufficient for revenue. Now the road has been built and it can live if it never hauls a sack of grain. One of the great mineral fields of the world is up there; smelters are rising, water-power is being harnessed, millions are pouring into the country."

Driving the golden spike will not finish the Hudson Bay line. It will be the birth of the railroad that so practical a railroad as Sir Henry Thornton says is never finished. Manitoba Free Press.

Medicine Hat Air Port

Arrangements are under way to have an air port in Medicine Hat, said Dr. Gerahaw, M.P., who recently returned from Ottawa where he has taken an active interest in the project. He understood that the line would link up Calgary and Canmore, Regina and Moose Jaw with Medicine Hat.

"I suppose you will soon be married, Glen?"
"Not just yet. Marie's pig is not fat enough yet." — Lucille Laugel.

W. N. U. 1785

Farmers Help Themselves

Establishing Grain Industry On a Sound Economic Basis

"While much is said in regard to the rapid development of grain industries, very few people at the present time realize the tremendous efforts the farmers of Western Canada are making to establish the industry of grain growing on a sound economic basis, and under full control of the growers themselves," says an article in the "Vancouver Sun" of June 18, 1929. "Every move made by the Pool is based on sound business principles, the object being to secure for the grain grower the last possible cent for his grain. The idea behind the Pool is centralized and continuous control of the grain delivered to the organization, which amounts to over half the total delivered to country elevators, and the members are devoted to the Pool, as they look upon it as being their sole hope of achieving a place in the scheme of things to which their toil entitles them."

British Columbia Bulbs

Sent To England To Be Planted In Old Country Parks

British Columbia bulbs, believed to be the equal to the best grown in Europe, will be planted in the public parks of England to encourage their importation into the Old Country, said Premier Talmie, the other day. He added that Sir William Clark, British High Commissioner in Canada, was much impressed with British Columbia flowers when on his recent visit and had suggested to the Lieutenant-Governor, that British Columbia bulbs might be exported to Britain to be planted, and labelled, in the public parks.

Cuba's most ancient city, Barcelona, is to be improved and embellished after hundreds of years of neglect.

Criticizes History Books

Says Canada's Part In The Great War Passed Over Lightly In Text Books

Public school history text books which have been adopted in several provinces of Canada, contain "19 words devoted to the part Canada played in the Great War," stated Dr. J. L. McDougall, formerly of Regina, Sask., now of Vancouver, B.C., national vice-president of the Native Sons of Canada, in the course of an address before the eighth annual convention of that organization, at Winnipeg.

"Such a condition of affairs in the education of our children is a colossal shame and national disgrace," he declared. The text books were published in the United States and edited in the United States by Americans, said Dr. McDougall. Educational authorities, when asked for an explanation, had replied "that at the present time there is no one adequately equipped and willing to take the time to edit such a history," the speaker said.

Saskatoon Cattle Show

Breeders Well Satisfied With Prices That Prevailed

At the recent Saskatoon Cattle Show and Sale, good average prices were paid for bulls, thirty-eight head of Shorthorn bulls averaging \$170. Fifteen head of Shorthorn females averaged \$114, four Aberdeen Angus bulls averaged \$175, three Hereford bulls averaged \$188, and an aged Holstein bull sold for \$110. Quite a number of bulls, including both the champion Aberdeen Angus and the champion Hereford were bought by Saskatchewan Live Stock Branch, the buying being attended to by the Live Stock Commissioner. Many of the bulls were quite young but the breeders were well satisfied with the prices that prevailed.

British Columbia Tobacco

The B.C. Provincial Government has secured fifty pounds of white burley tobacco grown in the Vernon district and will blend it with the Sumas product. The mixture is to be placed on the market to test the commercial suitability of British Columbia tobacco.

National Research Council Will Endeavor To Solve Many Economic Problems

Rust Resisting Wheat

Three Varieties Of Wheat Which Will Withstand All Known Kinds of Rust

Two or three varieties of wheat which will resist rust have been developed by the department of agriculture. It was stated by Dr. J. H. Grisdale, deputy minister of the department. The experiments have been conducted for some years, but the stage has now been reached when it can be stated with considerable assurance that success is near at hand. "Our experiments this year confirm the earlier prospects," said Dr. Grisdale. "No names have yet been given the new varieties and it will be two or three years before they can be produced in sufficient quantities for seed distribution, but we feel confident that we have the kind now that will resist the known varieties of rust. It is to be remembered, however, that one rust will cross another and evolve a new kind, but the wheat grades discovered by careful research withstand them all. The annual damage done by rust is enormous, so the evolution of a wheat which will be unaffected by it is of incalculable advantage. In rust research we claim to lead the world."

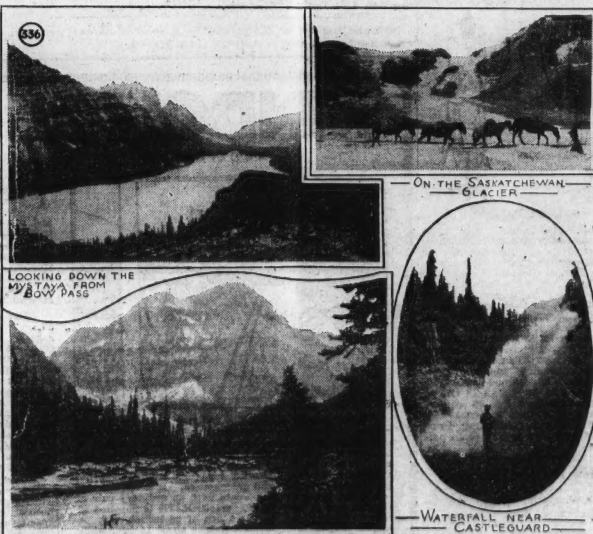

Has Faith In Alberta's Gas Fields

Engineer From Buffalo Predicts Province On Eve Of Great Development

H. R. Davis, an engineer of Buffalo, N.Y., who has recently been making an inspection of the oil and gas fields in Alberta and Saskatchewan, predicts that the former is on the eve of a great development in natural gas production. He states that he is convinced that the surface has only been scratched, and that in the near future there will be an enormous development in the production of gas.

Lavas rarely flow as much as a mile an hour.

Riding on the Roof of the Rockies

SHADOW LAKE UNDER THE SHADOW OF MT. BALL

Among the most spectacular of the Trail Rides ever attempted in the Canadian Rockies will be the one proposed to start August 8, and lasting 18 days to take in a long distance ride to the Columbia Icefield from Lake Louise. This icefield is the largest body of glacial ice left on the North American continent, covering 150 square miles and surrounded by peaks from ten to twelve thousand feet in height. The ride will be from Lake Louise up the Bow Valley to Bow Lake, over Bow Pass

and by the Mietz Valley past Waterville Lakes to the North Saskatchewan River, then up the Alexandra River Valley to Castlehead and the Columbia Icefield. Only Trail Riders holding at least the silver button, emblematic of completion of 100 miles of trail riding, will be permitted to join the expedition, since all taking part must satisfy the committee that they will not prove a burden to the rest of the party.

For less experienced Trail Riders,

or those who cannot spare the time, there will be a four-day ride starting from Banff August 1, and ending at Castle Mountain Bungalow Camp. It will take in the Egypt Lake district, which will be accessible for the first time this summer, so that those participating in this ride may regard themselves as pioneers. Beautiful Shadow Lake under Mount Ball will be the camp site of the riders on the second day out and, in all, seven glacier-fed lakes will be on the route of the trail.

Waste gas from Alberta's oil fields, loss from fermentation and other problems of the Canadian honey industry and "the iodine content, and control of iodized salts in Canada," will be investigated by the National Research Council. Decisions to underwrite this new work, in addition to the 100 or more other problems now under investigation, were made at a council meeting here.

All parties actively engaged in seeking a solution of the Alberta gas problem, which includes a wastage of 100,000,000 cubic feet per day, will be represented on the associate committee of the council that will probably hold its first meeting in Edmonton early in October. Dr. Chas. Canam, deputy minister and other representatives from the Dominion Department of Mines; Dr. G. S. Whittby, professor of chemistry at McGill University; representatives of the University of Alberta, who have given considerable study to the situation and Dr. H. M. Tory, chairman of the National Council, will be included in the personnel.

Work on honey has already been started in co-operation with the Dominion Department of Agriculture at the request of the industry and will be further advanced by an associate committee appointed at the meeting.

Iodine in salt was brought to the attention of the council by the Canadian Chemical Association, and the Canadian Medical Association, the declaration of the former being that "it is not yet certain that the indiscriminate use of iodized salt is entirely beneficial to public health. Some apprehensions of \$25,000 were granted at the meeting to aid research projects in Canadian universities. The largest sum went to Professor T. Thorvaldson, of the University of Saskatchewan, who for six years, has conducted an exhaustive study of the effects of alkali water on cement and concrete. A grant was made to Professor E. F. Burton, of the University of Toronto, for the purpose of developing his new method of determining moisture content of wheat, wood and other products. A grant of \$2,500 was made to Professor E. H. Boomer, of the University of Alberta, that he might continue his work on the economical utilization of natural gas. Color vision, generation of electricity, using the windmill as prime mover, internal parasites of sheep, swine and poultry, design of steel columns and struts for buildings and bridges, blood pressure reactions and the spectra of helium were included in the researches aided.

Origin Of The Word "Humbung"

Few people who use the word "humbung" so glibly, realize that it is a corruption of the name of a well-known German port. But years ago, when wars were common on the continent, so many false reports came from Hamburg that people used to say sceptically, "That is Hamburg!" So "Hamburg" became corrupted into "humbung."

Growing Use Of Water Power

The steady growth in the use of water power in Canada is shown by the facts that the average annual rate of increase in development since 1925 has been 10.7 per cent and that the total development now amounts to 5554 installed turbine horse-power per 1,000 of population.

"What has happened?"
"The cat scratched me."
"But about all those wounds on your head?"
"Oh, first of all she threw the soup tureen at me." — Esquella Barcelona.

WORLD HAPPENINGS BRIEFLY TOLD

Negotiations between representatives of the German and Belgian governments for settlement of the long-pending marks questions have been concluded and an agreement has been signed.

The first loans issued in British Columbia under the Canadian farm loan scheme, and it is believed the first issued in Canada, have been made through the provincial loan board.

Peping's "hello boys" went on strike because their wages were not paid on time. They did not stop work, but staged a "go slow" strike, carrying on their duties in leisurely fashion, and inconveniencing patrons.

Aaron Saprio, famous co-operative marketing expert from the United States, will again tour Saskatchewan this summer in the interest of a 100 per cent. membership for the Wheat Pool. The tour will start the latter part of August, according to a brief telegraphic despatch recently. Mr. Saprio's voice broke down during a recent tour of the West.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera, infantile diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

More than 1,350 shocks were felt during the Japanese earthquake of 1923, which took a toll of 200,000 lives.

The Friend Of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever required for.

The minimum resistance to the forward motion of the wings of an airplane is obtained with a thin wing which has a low lifting capacity.

Minard's Liniment for Earache.
Rubber jewelry is the latest fad. We wonder if wedding rings will carry a no-blowout guarantee.

A Severe Attack of Dysentery Checked by 4 Doses

Mr. I. Burtonwood, 620-22nd St. W., Saskatoon, Sask., writes:—"My child, when only seven months old, had a very severe attack of dysentery, and after three days' treatment with other things we decided to use

On this day his bowels had moved twenty-three times in eleven hours, but four doses checked it.
"A short time ago we offered it to a neighbor whose baby was troubled, and it too was relieved within thirty hours."

"We both always keep a bottle of Dr. Fowler's handy at all times. This medicine has been on the market for over 50 years; put up only by The T. Millburn Co., Ltd., Toronto, Ont."

W. N. U. 1795

Japan Favors Canadian Wheat

Wheat From Dominion Has Supplanted U.S. Product In Japanese Market

Quality and price are the factors which have enabled Canadian wheat to completely supplant the United States produce in the Japanese market, declares Tsuchiro Shoda, president of the Nishin Flour Mills Company, Limited, who was in Vancouver in the course of a trip of inspection which will take him to the wheat centers of Canada, United States and Europe.

The company which Mr. Shoda heads imports an average of 250,000 tons of Canadian wheat annually. It is all shipped through Vancouver. Mr. Shoda has been in the milling business for thirty years and operates 12 flour mills in all parts of Japan with a combined capacity of 25,000 barrels per day.

Manchurian wheat offers no serious prospect as a possible rival for Canadian wheat in the Japanese market, according to Mr. Shoda, on account of the uncertainty of deliveries, lack of handling facilities and absence of organized grading.

Winnipeg Newspaper Union

DIGNIFIED LINES
An attractive printed silk crepe with smart uneven hemline in handkerchief drape, with shaped hip yoke to secure slender appearance for the larger woman is seen in Style No. 230. The molded bodice has French V at front to break the crepe. It is finished with vestee forming a becoming square neckline. It is especially lovely in sheer printed crepe for more formal occasions. Flat silk crepe, crepe satin, georgette crepe, crepe Elizabeth and canton-faille crepe are smart suggestions. Pattern is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 1/4 yard of 10-inch contrasting. Price 25 cents in stamps or coin (coin preferred).

No jumpy feeling NOW when I drive through traffic

Nothing relieves tension so effectively as Wrigley's. The act of chewing, as motorists have discovered, has a gentle soothing effect. The healthful cleansing action of Wrigley's refreshes the mouth and soothes the nerves.

Judgment Is Reserved

Privy Council Withholds Decision On Dominion Fisheries Act

The judicial committee of the Privy Council reserved judgment on the appeal of the Dominion of Canada from a ruling of the Canadian Supreme Court which held that sections 7a and 18 of the Canadian Fisheries Act of 1914, were ultra vires of the Dominion parliament.

The important point at issue is whether under the British North America Act which gives it power to legislate "on seacoast and inland fisheries" the Dominion parliament can set up a system of licensing of fish canneries as it sought to do under the sections of the fisheries act.

The provinces of British Columbia, Quebec and Ontario, are respondents in the action as well as British Columbia fishermen of Japanese origin.

Fresh Supplies In Demand.
Wherever Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape bottles and can be carried without fear of breaking.

More than half the arable land in Japan is in rice.

SUNDAY SCHOOL LESSON

JULY 28

THE STORY OF DANIEL

Golden Text:—"They that are wise shall shine as the brightness of the firmament; and they that turn many to righteousness as the stars for ever and ever."—Daniel 12:3.
Lesson: Daniel 1:1-21; 2:13-19; 4:10; 7:28; 8:15-18; 9: 20-23; 10:1-19; 12:9.
Devotional Reading: Psalm 46.

Explanations and Comments

The First Captives Taken To Babylon, 1:1, 2.—It was in the third year of Jehoiakim's reign, 605 B.C., that Nebuchadnezzar, King of Babylon, first besieged Jerusalem and carried back with him to the land of Shinar (the old name of Babylon, Gen. 10:10), Jewish captives, together with some of the treasures of the temple which he then had placed in the treasure-house of his god Marduk. Among the captives were Daniel and three other youths of his lesson. Daniel belonged to a family of high rank in Jerusalem, and, according to Jerome, was at this time only a boy.

The Training Of Daniel And His Companions In Babylon, verses 3-7. Nebuchadnezzar directed Ashpenaz, master of his convicts, to take the Jewish youths of noble birth who were especially fair and bright and wise, and were therefore potential candidates for official positions, and teach them the language and wisdom of the Chaldeans. The king also directed that the youths were to be nourished with a portion of the food and wine which were prepared for himself. After three years they were to become his attendants.

Among the youths selected were Daniel and three companions, Hananiah, Mishael, and Azariah. Daniel's name meant "God is Judge"; Hananiah's, "Jehovah is gracious"; Mishael's "Who is what God is?" and Azariah's, "Jehovah has helped." Ashpenaz called them instead Elnishazzar, Shadrach, Meshach, and Abed-nego, giving them names which, it is thought, had reference to Babylonian deities.

Minard's Liniment for Rheumatism.

Registered Seed

It is hoped to have the plant of the Saskatchewan Registered Seed Growers' Limited, on South Hill, Moose Jaw, ready to handle the registered seed from the 1929 crop. This follows the passing of estimates in the House of Commons, on behalf of the Department of Agriculture, of \$150,000 for the seed cleaning plant and warehouse at Moose Jaw.

A woman first sheds a few tears—and then proceeds to open the telegram.

A spool of thread was unknown 125 years ago.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine Before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."
—Mrs. Milton McMullen, Venessa, Ontario.

Record Of Fire Losses

Fire losses in Canada during the week ended July 10, 1929, are estimated by "The Monetary Times" at \$239,500, as compared with \$139,200 for the previous week, and with \$264,750 for the corresponding week of last year. From January 1, 1928, fire losses totalled \$11,135,950, and from January 1, 1929, to July 10, 1929, they were \$12,976,250.

The course of true love never runs smooth, and in later years the bachelor is often glad of it.

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 135 to 220 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

RUSSIA BREAKS OFF RELATIONS WITH CHINA

Moscow.—Russia has broken off diplomatic relations with China.

The Soviet government made public its reply to the Chinese note, the latter having come in response to an ultimatum from Russia. In this note the Soviet Union said that all means of reaching an amicable settlement had been exhausted.

The note placed the entire responsibility for all consequences upon the Chinese government. It announced also that all Soviet diplomatic and consular officials and all government commercial representatives would be recalled at once from China.

It further declared that all Soviet officials would be recalled from the Chinese Eastern Railway; that all railway communications between Soviet territory and China would be suspended, and that the diplomatic and consular representatives of the Nanking government would be ordered immediately to leave the Union of Soviet Socialist Republics.

The Russian action in breaking off diplomatic relations with China came at the expiration of time set in an ultimatum which the Soviet Union dispatched to the Central Republic headquarters on July 13. That ultimatum gave the Nationalist Government, at Nanking, three days in which to rescind its action in seizing the Chinese Eastern Railway in Manchuria.

It also demanded restoration of office of the Russian officials who had been deported from their places in the railway and the liberation of all Russian nationals who had been imprisoned. By the terms of the ultimatum, the closing of Russian institutions in Manchuria, such as banks, railway unions, and business syndicates was also to be rescinded.

Lower Potato Crop

Canadian Acreage Shows Five Per Cent. Decrease From 1928

Ottawa.—The Canadian potato acreage indicates a five per cent. decrease from 1928 figure, with 569,000 acres as compared with 599,000 acres last year. Western provinces report practically the same acreage while Ontario, Quebec and the Maritimes all report slight to fairly heavy decreases. In British Columbia a good crop is anticipated. In the prairie provinces dry weather conditions are creating fears that the potato crop will be light this year.

Torrential Rains In India

London, Eng.—Exchange Telegraph dispatches from Bombay said widespread floods were reported in the Sind division of that province. At Sukkur Barrage the entire township has become submerged, with 12 deaths. In Middle Sind hundreds of cattle died from exposure in torrential rains. Miles of desert have been transformed into a huge lake.

Northcott Will Appeal

San Francisco, Cal.—Counsel for Gordon Stewart Northcott, convicted slayer of little boys on his Wineville "murder farm" were ordered to file briefs on his appeal before August 5, by the state supreme court. Northcott is under sentence of death and his mother is serving a life term in San Quentin for participating in the same crime.

Will Rescue Stranded Airmen

Ottawa, Ont.—The department of marine has made arrangements to have the Canadian government vessel "Acadia" call at Port Burwell in about ten days and take off the Chignecto fliers who are stranded there following the destruction of their plane. The "Acadia" will take the fliers to Fort Churchill.

B. C. Fire Losses Higher

Vancouver.—Fire losses in British Columbia during 1928 amounted to \$2,667,554, against \$2,622,905 in 1927, showing an increase of more than forty-four thousand dollars, according to the annual report of J. A. Thomas, provincial fire marshal.

W. N. U. 1705

Had Miraculous Escape

Vancouver Salesman Pinned Under Interurban Car Had Hand Injured

Vancouver.—Charles Kinniburgh, aged 60, a Vancouver salesman, was pinned for more than a half hour in his demolished touring car under a big steel British Columbia electric interurban car, but escape with a bruised hand. The interurban had to be jacked up before he could be released.

Kinniburgh was driving across the intersection when the interurban crashed into him, overturned his car and ran up on top of it. Although the electric car was crowded, no one on board was injured. Kinniburgh was imprisoned in the driving seat of his automobile with only his head and shoulders visible. Police squads, railway employees and ambulance men laboured feverishly to extricate him, but without success until a large jack was brought, and the interurban lifted. The imprisoned man directed the operations, although suffering agony because of the manner in which his hand was caught. After his release it was found at the General hospital that he had suffered no other injury.

London-Paris Electric Railway Is Planned

Scheme Would Employ Fifty Thousand Men For Ten Years

London, Eng.—The Observer says that the committee on English channels and communications, which will report late this year, probably will outline plans for an electric railway from London to Paris at an estimated cost of \$900,000,000.

The reported plan calls for a road which it would take 50,000 men ten years to build. The plan contemplates twin tunnels under the English channel, the Observer said, each 23 feet in diameter and 44 miles long. The line would use a railway track on a seven-foot gauge.

Tremendously powerful electric locomotives would be used to haul trains from London to Paris in the rapid time of 2 hours and 45 minutes, if the plan outlined by the newspaper is carried out.

Government Is Powerless

Cannot Refuse Clearance To Liquor Boats Under Present Law

Ottawa.—The matter of refusing clearances to liquor-laden boats destined to the United States is not within the competence of the federal government as the law stands at present, nor can it come within that competence until authority for such a course has been given by act of parliament.

This was the statement of Hon. W. D. Euler, minister of national revenue, in an interview. "I adhere to the sentiments expressed on that subject last session, and I am convinced that subsequent developments have borne them out."

No Cause For Alarm

Edmonton.—General conditions in the west do not give cause for any alarm over the danger of unemployment this winter, was the opinion expressed by Hon. Robert Forke, federal minister of immigration, on reaching here from the East. He was accompanied by W. J. Egan, deputy minister, and had on his program an immigration conference with the provincial government.

Grain Board Appointment

Ottawa.—The appointments in connection with the re-organization of the grain board will not be made until the first August meeting of the Dominion cabinet. Hon. James Macdonald, Minister of Trade and Commerce, made this announcement. The minister declined to intimate how many of the present board would be replaced by new men.

Four Die In Fire

Cornwall, Ont.—Explosion of a coal-oil stove is believed to have caused a fire which swept five residences on Guy Street, East Cornwall, causing the death of four persons who were trapped in the burning building and injuring four others. Property loss is estimated at \$25,000 to \$30,000.

MAKING TOUR OF CANADA

Rev. W. C. Poole, Christ's Church, Westminster, president of the World Sunday School Association, who is making a tour of Canada.

Canada Wins Kolapore Cup

Eight Marksmen Recapture Famous Trophy Lost Last Year

Blisley Camp, Eng.—Canada won the Imperial Kolapore Cup. Eight marksmen picked from the Canadian Blisley team recaptured the famous trophy Canada lost in 1928, by a margin of 33 points over the Mother Country, with India, Guernsey and Jersey following in that order. The Canadian team aggregate was 1,083, while the Mother Country aggregated 1,050. The cup was shot for at three distances, 300, 500, and 600 yards.

Canada had gained a lead of 18 points at 300 yards. At the 500-yard distance their team aggregate had reached 729 points to 703 for the Mother Country.

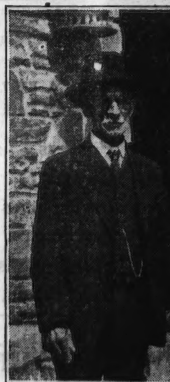

The standing of the five contesting countries at the 300-yard distance, first of the three ranges, was Canada, 360; Mother Country, 342; India, 336; Guernsey, 333; Jersey, 325.

Churchill Coming To Canada

Former Chancellor Of Exchequer Will Visit Alberta Oil Fields

Calgary, Alta.—Dr. Hon. Winston Churchill, former chancellor of the exchequer of Great Britain and occupant of other important cabinet posts in the Old Country will visit Calgary for three days in August. He will arrive late on August 24, and will remain until August 27. He will then proceed to Banff for a brief visit before going to the coast. This information was received through private sources.

He will visit Turner Valley oil fields and possibly some of the coal areas in the Calgary district.

Revisit Scene of Exploits

Left to right they are James Stephens, C.P.R. pensioner; and Tom Wilson, discoverer of Lake Louise in the early eighties. The photograph was taken recently at Banff. Mr. Stephens, who now lives at Oak Lake, Man., was astonished at the changes at Banff since he first saw the place fifty years ago. Then it was all virgin forest; nowadays it has a first-class hotel and what were rough tracks through the timber are

Reviews Boy Scouts

Premier King Addresses Contingent Going To International Jamboree

Ottawa.—Canada's Boy Scouts contingent to the International Jamboree opening at Birkenhead, England, on July 27, was reviewed on Parliament Hill by Premier W. L. Mackenzie King. Later, addressing the Boy Scouts and leaders—representative of every province of the Dominion and the Yukon Territory—in the Hall of Pains, in the parliament building, the Prime Minister made an inspiring appeal to the youth of this country for a full realization of citizenship in this Dominion and in the Empire.

Postpones Atlantic Flight

Unlikely That Cote Will Make Attempt This Year

Paris.—It appeared improbable here that Digne Cote would make another attempt to fly across the Atlantic this year. He has not abandoned his plan, but when asked when might be carried out he replied laconically: "There is no hurry." The backers of the flight, who built the aeroplane and its motors, have been silent concerning a new attempt, which gave support to the growing belief that it was not likely to be in 1929.

Received By Prince

Professor W. L. Carlyle Visits His Employer At St. James's Palace

London, Eng.—Professor W. L. Carlyle, manager of the "E.P." ranch at High River, Alta., was recently received by the Prince of Wales at St. James's Palace. Nothing was said as to the conversation between the Prince and his ranch manager, but undoubtedly his royal highness evinced a keen desire to know how the ranch was progressing. He has often intimated he was looking forward to another visit to the ranch.

Berlin-London Television Service

London, Eng.—Within two or three months a telegraphic transmission service for photographs, pictures and similar matter will be opened between London and Berlin for the general public. This announcement was made in the House of Commons by Hon. H. B. Lees-Smith, postmaster-general.

Expect Larger Apple Crop

Ottawa.—Canada will have a big apple crop this year. The commercial crop is expected to be 11 per cent. greater than last year and 21 per cent. greater than the five-year average with a total of 3,606,417 barrels.

WILL REQUIRE LESS HARVEST HELP THIS YEAR

Winnipeg.—Not more than 25 per cent of the harvest help that hustled westward to the prairie provinces last summer, to assist in harvesting a bumper crop will be required this year to clear a comparatively small showing of grain; a promising crop indeed last spring, but one that has suffered from the ravages of a boiling sun, continuous waves of intense heat and lack of moisture.

Where a force of 50,000 husky young men from Eastern Canada augmented by several thousands young Englishmen brought overseas for the purpose, were paid to work last year harvesting thousands of acres of wheat, probably 10,000 and certainly not more than 15,000 will be sought to work in the west's best-travelled fields next month.

This was a estimate given recently by J. A. Bowman, general superintendent of employment for Manitoba, when interviewed by the Canadian Press.

The "unemployment" situation throughout the west is not considered serious, in the opinion of Mr. Bowman. Hundreds of men are working in Winnipeg and other centres at the present time, he said, but the situation was not at all unusual.

No difficulty is anticipated by the Manitoba unemployment bureau in placing hundreds of available men now here when harvesting gets under way.

He added that only a small number of outside help would be needed if the dry weather that is now prevailing in all three prairie provinces continues for another week.

Will Head New Bank

Hon. Sir Robert Borden Elected President Of Barclay's Bank, Canada

Montreal.—The Right Hon. Sir Robert Borden, former prime minister of Canada, was elected president of Barclay's Bank, Canada, at the first meeting of the shareholders held here.

Sir Robert will assume his new duties on September 3, when the bank will commence business. Arthur B. Purvis was elected vice-president, and J. R. Booth was appointed manager.

In addition to Sir Robert and Mr. Purvis, the following were elected to the board of directors: Hon. L. A. Taché, premier of Quebec; A. A. Magee, W. O. Stevenson, H. P. Alton, and J. S. Crossley.

Defer Driving Golden Spike

Ottawa.—The golden spike which will mark the completion of the Hudson Bay Railway will not be driven this year after all. Engineer Caswell, of the Canadian National Railways, has returned from an inspection of the railway and reports that a million yards of ballast must still go down, and it will be October before this work can be carried out. It will be 1930 before the railway can be considered as completed to tidewater.

Many Students From West

Kington, Ont.—Queen's summer school, in progress now, attracts students from all parts of Canada. Saskatchewan sends 23, Manitoba 8, Alberta 8, and British Columbia four. Two are from the United States and one from China. Canadian history is strongly emphasized. The students enjoy the historic places in Kington and the use of Queen's library.

Preparing For Trip

Friedrichshafen, Germany.—Dr. Hugo Eckener has stated, definitely that the next flight of the dirigible, Graf Zeppelin, to the United States, has been planned for the first week in August, but that the date has not yet been fixed.

Poland Honors Aviator

Warsaw, Poland.—The Polish schooner Iskra will bring the body of Major Ludwik Jaskolski back to Poland, where honours will be paid it. Religious ceremonies have been held throughout Poland in memory of the aviator.

Here and There

(342)

An Indian grave, discovered by accident by Canadian Pacific employees at work near Brooks, Alberta, last May, is considered by experts to be between 300 and 400 years old. It is thought the grave was originally above ground but the passage of centuries had buried the grave below the soil. An irrigation ditch was being constructed when the grave was discovered.

Tri-motored airplanes are being launched in one of the most spectacular fights in the history of aviation. War has been declared by the Canadian Government on the spruce bud worm and the airplane is to be the principal arm of the service. Planes each carry 1,600 pounds of powder, and will dust it while flying low, over the tree tops.

The blueberry industry is showing much improvement in Yarmouth and Shelburne counties, Nova Scotia. Last year there were only 4,000 acres of crops, last year burned for blueberry growing; this year 10,000 acres have been burned. Value of crop last year was \$65,000 and it is estimated that the crop's value could be increased to half a million dollars.

The province of Alberta has adopted Old Age Pensions. The scheme for which are provided by co-operation between the federal and provincial governments. The scheme has now been adopted by all Canadian provinces from the Quebec boundary westward.

Though crops in several parts of Western Canada would be benefited by rains, crop outlook on the whole is very promising. Reports from all parts of Saskatchewan are generally encouraging. The Alberta report is good, especially the Peace River country where prospectors indicate one of the best crops on record. About 25,000,000 acres are said to wheat in Canada this year. Last year the Dominion harvested over 53,000,000 bushels of wheat, the largest crop in the country's history.

The fourth annual midsummer gathering of the Swedish-Canadian League held a two-day convention at Lac du Bonnet, Manitoba, recently and decided to build a home for Old Swedish folks at Winnipeg. Another feature of the gathering was a pageant of old Swedish folk-dancing and songs presented in old-time costumes. Many of the dancers were the same who appeared at the Regina festival held earlier in the year at the Saskatchewan hotel in that city.

A list of extraordinary accidents has recently been published concerning to motorists at level crossings and included the following:—One driver parked car on tracks and went to sleep. 44 motorists drove into the sides of moving trains. 38 drove into the sides of standing trains. One tried unsuccessfully to drive between railway cars while they were switching. Seven went for a drive alone the tracks and met express trains. One driver left his car on the tracks while he went to search for something he had dropped on the road; when he returned there was nothing left of his car. Seven found out too late that their brakes needed relining.

SYNOPSIS

Marcus, the famous Broadway producer, heads a party of four that visits Blackie Joe's night club in downtown New York. Al Stone, Blackie's chief comedian and singing waiter, begs Molly, the ballad singer, to render a love song he has just written for her. Molly is disdainful and refuses even to read the song. Al is in love with her but she tells him harshly that she will never marry a waiter. Then she leaves her dressing room and goes to the Marcus table, trying to ingratiate herself with the famous producer. Al is in despair, Grace, the cigarette girl, who loves Al and wants to see him happy, asks him what is the matter.

CHAPTER V.

"Nothing's the matter, kid," said Al, making a show of throwing off his depression. But his was smile belied his words.

Grace grazed hopefully up into his face. Her expression said plainly that if he would only confide in her she was sure she could help him. Slowly he studied her young, sensitive features. She was an awfully sweet kid, undoubtedly, and he liked her, but—

At that moment someone else arrived to interrupt his thoughts. Blackie, all excitement, entered the corridor, calling out:

"Get ready Al—you're on next!" Al turned lack-lustre eyes toward Blackie. Then, suddenly, a plan that had been forming vaguely in his mind ever since Molly's harsh exit, took definite shape. He drew himself up and said quietly:

"Blackie, I'm quitting tonight." Blackie retreated a step as if he had been struck, while a little cry of amazement escaped Grace. Her hand went to her mouth in a quick gesture of apprehension. Blackie was the first to recover himself.

"Don't be a fool, Al," he said earnestly, putting a hand on his singing waiter's shoulder. "You've got a good job here and a following among the customers. You can't quit off-hand like this—why, it wouldn't be fair to me or to yourself."

Al nodded slowly. Yes, he had thought of that. But there were other things to be considered.

"You won't miss me," he suggested. "You've got lots of talent. And I simply couldn't sing a comic song tonight—it's impossible the way I feel." And Blackie—I don't want to be a waiter any more. I want to write. The waiter racket will never get me anywhere—I know it!"

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

parts. You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

in Blackie's mind to aid his singing waiter. After all, Al was his friend as well as his star performer in the floor show, and he wanted to do him a good turn if he could.

"Why don't you read your song to Molly?" he suggested, with assumed carelessness.

"She won't listen," Al answered. "To her I'm only a waiter—a mug!"

"Then why don't you sing it to her?" continued Blackie, springing his idea. "She's out there now—she'd have to listen."

Al shook his head. "I can't sing it. It's my love song—a ballad. You know I've never been able to sing the heart-throb stuff. That's not my line. I'm a comic."

"You haven't sounded so darn comic," Blackie countered quickly, "telling us all this. How do you know you can't sing heart song? Have you ever tried it—I mean in public?"

"No, I've never tried one on the floor," Al admitted, "but I've tried rehearsing them and I was an awful flop."

"Yes, but don't you see, this is different. You wrote this song for Molly and you feel it. If you go out there and forget yourself, and sing it at her, you can make her feel it. Take a chance—they can't tell you. If the song goes over she'll understand for the first time how you really feel about her. Look what you stand to win!"

Al stared into the earnest eyes of Blackie, almost convinced. Could he do it, could he put the same feeling into his singing that had possessed him when he wrote the song. If he could he might be able to touch Molly's heart, as Blackie suggested.

Little Grace watched anxiously the play of expression on Al's face. She saw clearly what Blackie was driving at before Al saw it, and she hoped desperately that he could prevail on Al to try the song. If the words touched Molly's heart at least Al would be happy, which would make Grace happy.

"I'll do it," he said finally, with a gesture of decision. "I'll show her I'm something better than a waiter. I'll put everything I have into that song."

Blackie wrung his hand. "Go to it, boy," he said enthusiastically. "You'd better make your entrance as soon as you can—while you're in the mood. Meanwhile, I'll see how the show's going."

When Blackie disappeared Grace almost vanished down the corridor. But as Al came out into the main room a moment later he heard his name called. Grace slipped over to his side, looked up into his face with a forced, wistful smile and whispered:

"I'll be rooting for you, Al!" "Will you, kid? Say, I appreciate it."

He raised his hand, patting her lightly on the cheek, as he would have caressed a sister. He noticed that her cheek was ~~too~~ warm, but he thought it was merely from excitement.

As he turned nervously away Grace raised her hand to her face, where his hand had rested for an all too brief moment. The spot was burning. She saw him move lightly across the room and approach the pianist to give him the new music. The pianist's mouth opened in astonishment at the idea of Al Stone, the comic, singing a heart song. Then Grace saw the man she loved heading for another woman. Would he put it over?

(To Be Continued.)

An Airplane's Buoyancy

A plane requires air to sustain it and on which the aeroplane propeller can "bit" in order to pull the plane along, and the entire air belt around the earth is as much a part of the earth and as much subject to the earth's gravitation as the oceans on the earth's surface. No plane could fly beyond the earth's gravitation area. A body ceases to feel the pull of the earth's gravity at a distance of about 215,000 miles from the moon. Here it would have no weight, the gravitation attraction of earth and moon being at that point equalized.

Brick Yard For Prince Albert

It is reported that the International Clay Products Company, of Eastern Canada, have purchased property in Prince Albert with the intention of making bricks there.

American Chemical Society Told Gasoline Can Be Made From Trees

Gasoline made from trees is announced in a report to the American Chemical Society by Dr. Jacques C. Morrell and Dr. Gustav Egloff of Chicago.

They have produced an anti-knock motor fuel from the tar in the Douglas fir. While this fuel now is in the laboratory stage, the report says it can be made in commercial quantities from present wood waste.

"The development of a practical and economic means of converting wood waste into motor fuels," says the report, "has a deeper significance than the immediately important factor of conservation—it provides a source of motor fuels for the future which is under the direct control of man."

"Our great storehouses of potential motor fuel from petroleum, coal and oil shales are heritages from past ages, while wood tars and other vegetables are producible under controlled conditions."

Approximately 24 per cent. of the standing tree is converted into useful products, while 76 per cent. is waste.

Little Helps For This Week

"The eternal God is thy refuge, and underneath are the everlasting arms."—Deut. xxxiii. 27.

What though the way be rough and steep?

What though we stumble as we blend?

There's joy reserved for those who weep.

The everlasting arms are kind.

What matters it if sorrows come?

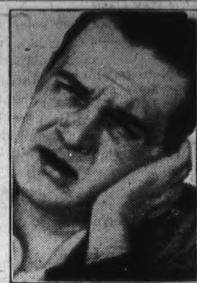

What though the night be dark and long?

The darkest cloud but hides the sun; The everlasting arms are strong.

One great purpose to all affliction is to bring us down to the "Everlasting Arms." What new strength and peace it gives us to feel them underneath us! We know that, far as we may have sunk, we cannot go any farther. Those mighty arms can not only hold us, they can lift us up. They can carry us along. Faith, in its essence, is simply a resting on the everlasting arms. — Theodore L. Cuyler.

Government To Aid Berry Growers

The B. C. Government has undertaken to assist berry growers to preserve their surplus crop of the 1929 season and is advancing a loan to a company to be known as Berry Processors Limited, which will have plants at Victoria, New Westminster and Hazelton.

MOST people rely on Aspirin to make short work of their headaches, but did you know it's just as effective in the worse pains from neuralgia or neuritis? Rheumatic pains, too. Don't suffer when Aspirin can bring such complete comfort without delay, and without harm; it does not affect the heart. In every package of Aspirin you will find proven directions with which everyone should be familiar, for they can spare much needless suffering.

Aspirin is a Trademark Registered in Canada

Want World Peace

A petition signed by 17,900 women voters of the district of Bolton, asking the House of Commons to use all possible efforts to secure world peace by the fullest use of the Kellogg pact and the optional clause of the compulsory arbitration agreement, has been presented to the House by Albert Law, Labor leader.

Stony Plain and District.

IT PAYS TO PAY CASH.

Mr E H Baron has been appointed a Commissioner for Oaths.

Mrs Chris Neiman, who had been visiting here with her brother John Ducholke, has returned to her home at Medicine Hat.

Mr and Mrs J McCulla and family are holidaying at the Coast.

Mr Ph Trapp has accepted the position as foreman of an Edmonton bakery.

Mr M Comisarow is spending a fortnight's vacation at Banff.

Mr and Mrs Henry Miller motored down to Banff over the week-end. Rev B Behrends and Mrs Behrends, of Josephburg, motored down with them.

Mr C Rodman, J Leduc, is visiting at present with Mr W Comisarow.

The Davis-Fitzpatrick outfit returned to town on Saturday. They had been engaged in railroad work at the level crossings from Stony west to Falls.

Contractor Wes Hubbel has made a very good job of grading on the approaches to the bridge over Dog Creek.

Weed Inspector Jim Warner has been making the rounds of the town's vacant lots, eliminating the noxious weeds.

Late Monday night a party broke into the restaurant of Mr Emil Miller, next Royal Hotel, and stole a number of articles. The same night some one took Ralph Lory's shot-land pony, drove it north about six miles and turned it loose. The pony was recovered Tuesday noon.

Mr and Mrs M McKinlay celebrated the anniversary of their silver wedding on Saturday last, in Edmonton. The affair took place at the Old-Timers' Cabin. Mrs McKinlay was presented with a bouquet by Mr Kenneth McLeod.

Owing to an accident to the local electric lighting plant, the streets were in darkness, and the stores had to resort to their secondary lighting systems.

The recent unprecedented rise in the prices of wheat and coarse grain is having the effect of making farmers haul in to the elevators what grain they have on hand; consequently, the elevator managers are experiencing a mild rush for this season of the year.

Service at United church Sunday evening at 7.30; Rev G A Sauder.

Stony Plain young people were well represented, Tuesday night, at the chivari given to the Newlyweds, Mr and Mrs Philip Kulak, at the Ursel homestead. The party was given a good reception, and came away well satisfied.

Carvel Clippings

A dance is being held at the Ukrainian hall next Saturday evening.

Mr Herb Ingram is breaking a large area of land with the tractor outfit he brought up from Bruderheim.

Good progress is being made on the new cut-off to the Baseline, and the road will shortly be thrown open to the traveling public.

Kulak—Ursel

A very pretty wedding was solemnized on Tuesday, July 23d, at St Matthew's church (Missouri Synod), when Miss Margaret Ursel (the youngest daughter of Mr and Mrs Jac Ursel Sr, Golden Spike) was united in marriage to Mr Philip Kulak (son of Mr and Mrs Philip Kulak, Rosenthal district). Rev E Eberhardt, pastor of the church, officiated at the ceremony.

After the service at the church, the bridal party, accompanied by their friends, motored to the residence of the bride's parents, where tables were spread with all manner of refreshments, to suit the tastes of the very large number of friends and acquaintances who attended.

Edmonton Exhibition.

The station agent reports that never before have so many attended Edmonton Ex. from this district. This does not take into account the ever so many cars which took in visitors.

Two of the oldtimers from this district, Messrs Conrad Becker and Joe Wocasok Sr. were visitors to the Ex. on Sports day, and enjoyed themselves in a hearty manner. They met a number of oldtime friends while in there, and returned home on the evening train.

The exhibitors from hereabouts were fairly successful, with Mr J Strassburger taking the lion's share of prizes in the classes in which he had exhibits. Following are some of the awards:

In the Children's Classes Carl Pitzler got 2d prize for carrots; and 2d prize for his collection of garden vegetables.

H Schellenberger—3d for his Marquis wheat; 4th for a sheaf Spring wheat; 2d for sheaf of 2 row barley; 4th for sheaf of white oats.

M Schellenberger—3d prize for 3-yr old Ayrshire cow.

Jacob Strassburger—2d prize for sheaf of Spring wheat

1st, sheaf 6-rowed barley.
1st, sheaf white oats
3d, sheaf of alfalfa
1st, sheaf of field peas
2d, white turnips
1st, kohl rabi
2d for beets
1st, round cabbage
1st, cauliflower
1st, cucumbers
2d for lettuce
1st for collection of garden vegetables

Many things may be preserved in alcohol, but reputations are not among them.

One of the nice things about insect pests is that they never talk politics.

The Narrow Grades

Another auto come-together party occurred on the Baseline Saturday night, when Touring No. 70974 met Roadster No. 92376. On the break away, the roadster caromed to the side of the road, and rolling over and turning round while making the descent of the grade. Several cars arrived on the scene shortly after, and the occupants of these helped put the roadster back on the trail. The drivers of the contesting cars live in this district, and neither received serious injury.

Music Exams. Results.

Marks given indicate: 60 to 69, passed; 70 to 79, honors; over 79, first-class honors.

Junior piano, Mirella Larson 65.

Primary piano, Miss Marie Clarke, 61.

Elementary piano, Rachel Willie 81, Alice Wocasok 66, Madeline McCulla 64.

Introductory piano, Josephine Price 74, Irene Jespersen 66, Betty Kulak 64.

Primary violin, Knux Mc Kinnon 65.

Introductory violin, Edw. Schoepp 60.

These are pupils of Mr Gus Barth.

Spruce Grove News

Altho no appointment has yet been made to the principalship of the local school, the majority of the Board is said to be favorable to the candidature of J L Pearcey, who had formerly taught in Edmonton.

Mr M Ducholke returned Saturday from Edmonton, where he had been a demonstrator for I.H.C. machinery at the Fair.

Mr John Schultz left last week for Wembley.

Mr Joe Miller was the fortunate winner of a valuable Navajo blanket at last week's Exhibition, for which he has refused an offer of five pounds from a local Scotsman.

The big sale advertised for Saturday last at the Napoleon Gagne farm was postponed, owing to counter attractions.

A number of Indians from the Reserve are on a pilgrimage to Lac Ste Anne, this week.
